

# AI-Powered Consolidated Candidate Search

Consolidated platform to search, match, and rank candidates from multiple job portals using official professional data aggregation APIs and AI-powered candidate-job description matching.

## Unified Search

Unified way to search for candidates from various job portals such as LinkedIn, Indeed with centralized candidate data access

## Job Description Matching

Input your job description to automatically rank and match candidates by relevance

## Official APIs

Uses official employee aggregation APIs that comply with POPI and GDPR data privacy laws to source candidate profiles

## Focus on Best Fits

AI ranking prioritizes ideal candidates, reducing manual resume screening

## Unified Search & Job Description Matching

One platform, multiple sources, AI-powered candidate ranking

### Step 1: Unified Candidate Search

Data Analyst in Cape Town with Python and SQL skills

#### Job Title

Data Analyst

#### Location

Cape Town, Western Cape

#### Required Skills

Python, SQL, Excel

#### Experience Level

2-5 years

#### University Name

University of Cape Town

#### Certifications

AWS, Google Analytics

#### Industry

Technology, Finance

#### Languages

English, Afrikaans

Search across LinkedIn, Indeed and other job portals in one unified search

### Step 2: Input Your Job Description

#### Job Description Example:

"Data Analyst with 3-5 years experience in Cape Town. Must have strong Python and SQL skills, experience with data visualization tools like Tableau or PowerBI. Bachelor's degree in Computer Science, Statistics, or related field required. Experience with machine learning is a plus."

AI automatically analyzes job requirements and matches against candidate profiles

### Step 3: AI-Ranked Results Based on Job Description Match
